PERSONAL PROJECTS

Cloning tapAcademy website

- ▣ Replicating the Tapcademy website involves meticulously recreating its design and functionality using HTML, CSS, and JavaScript. Start by analyzing the layout and structure, then use HTML to build the foundation. Employ CSS for styling to mirror the visual elements, and utilize JavaScript to replicate interactive features. Ensure responsiveness for a seamless user experience across devices. [↗](#)

Airport Management (CRUD)

- ▣ Designed and implemented an Airport Management System using Spring MVC, Hibernate, JSP, CSS, and Java, with MySQL for database operations and Maven for seamless project management. [↗](#)

Online Banking

- ▣ I used technologies such as Java, JDBC, JSP, HTML, CSS, JS, and MySQL to develop a project, enhancing my knowledge. The project aims to be user-friendly and interactive for users. [↗](#)
